Subject: SDS Info for Polymer release
Attachments: Arkema-SDS.pdf; Monomer-breakdown.xls; release-in-water.jpg

Good Morning Gerald

Thanks for reaching out. Attached is information on the acrylic monomer release in Bristol, PA. Huge concern about levels of the monomer entering the DW intakes. ATSDR has provided the risk numbers for the individual components. As of right now, limited sampling performed to the ppb range.

I am seeking advice which I can pass on explaining the difference of the individual monomers used to make the product compared to the dilution of the polymer in water. This is very important as it affects drinking water intakes

Any assistance you can provide is appreciated

Thank you
Chris
